

## DEKORDOR® HD CONTINUOUS PRESSURE LAMINATE (CPL) PRODUCTS

### ✔ STORAGE

Being a fully finished product, its assembly should not be started before the completion of all the interior decorating, flooring, window panes and glass, electrical installation, sanitary ware and wall painting. The transportation and movement of the materials should be carried out with maximum care, in order not to cause any damage.

The installation of products should be carried out according to the manufacturer's instructions. If necessary, use protective gloves to avoid leaving smudges on the surfaces of the products.

We recommend that the place where the door and the frame has been stored or installed, to be suitably ventilated so as to prevent excessive accumulation of moisture which causes degradation of the material. Environments with moisture content exceeding 60% and temperature below 5°C or above 30°C for prolonged periods may cause irreparable damage.

In any of the above mentioned conditions, we recommend contact with the supplier before any repairs are undertaken.

### ✔ PACKAGING

A specific packaging to avoid the contact between the faces of the doors has been used. At no stage should finished doors be stacked without protection between the door faces.

**Notes:** As we are constantly improving our product range, we reserve the right to make changes without prior notice.

## DEKORDOR® HD CONTINUOUS PRESSURE LAMINATE (CPL) PRODUCTS

### ✔ MAINTENANCE

Doors and frames which are self finished faces, maintain their aspect and brightness as long as they are installed in places with suitable conditions.

Products should not be subject to very high temperatures or to high moisture, nor should they be exposed to direct sunlight.

For maintenance and cleaning, the use of a dry cloth or slightly dampened in tepid water, is recommended.

Never use or add preservative, polish or chemical cleaning products.

### ✔ REPAIR

Laminate faced products are not repairable on site.

### ✔ ECOLOGICAL INFORMATION

These products are stable with no known adverse environmental effects.

### ✔ DISPOSAL CONSIDERATIONS

At the end of our products' life, these may be considered for recycling or be put to other use.

**Notes:** As we are constantly improving our product range, we reserve the right to make changes without prior notice.
